

Disposable Ribbonizing Tools

US Conec offers disposable ribbonizing tools to aid the termination process of cabled loose fibers in 4, 8, 12 and 16 fiber configurations. The tool allows users to create short ribbons and utilizes a quick cure cyanoacrylate adhesive. This solution is ideal for applications requiring excessive handling and multi-row termination applications. The ribbonized fibers can be easily stripped and inserted into MT ferrules during the termination process. The disposable ribbonizing tools provide a low-cost, robust ribbonization option and are readily available for sale.

Disposable 4 Fiber Ribbonizing Tool

Disposable 12 Fiber Ribbonizing Tool

Disposable 8 Fiber Ribbonizing Tool

Disposable 16 Fiber Ribbonizing Tool

Disposable Ribbonizing Tools

Part Number	Description	Purpose
16764	Disposable Ribbonizer, 4F (Gray)	Creating 4F, adhesive based ribbons for insertion into MT ferrules, 10+ uses
